Hello, I'm Mayank Nagar. I'm persuing my B.tech in Computer Science Engineering from MGM's JNEC. A storyteller with analytical mindset and statistical knowledge. I am familier with many data science tools and machine learing algorithms. I did so many projects related to data visualization and machine learning. I work well in a team. I want to make my carrer in data science and experience the real world data. Other than academics I like to do graphic designing and I worked in a startup as a part-time graphic designer and also like playing basketball.

Skills

Tools and Languages	Python, C++, PowerBI, Machine Learning, Data science
Quantitative Research	Statistics, SQL
Communication	English, Hindi, Gujarati, Marathi

Projects

COVID-19 Prediction with Data Visualization
- In this Project I did the visualization of live data of COVID-19 with Jupyter Notebook and Plotly module

Customer Churn Prediction using Machine Learning
- Forecast customer churn with the help of machine learning algorithms and define its cause.
- https://github.com/mayanknagar10/Customer-churn-prediction.git

Sales Insights Dashboard
- Analysis and visualization of sales insights of firm using Power BI.
- https://github.com/mayanknagar10/Sales-Insights-dashboard.git

Education

Bachelor of Technology in Computer Science, *MGM's Jawaharlal Nehru Engineering College, Aurangabad*	2018 - Present
Higher Secondary Certificate, *Macro Vision Academy, Burhanpur*	2017-2018
Secondary School Certificate, *Little Angels H. Sec. School, Mhow*	2015-2016

Certificate

Machine Learning,	11-2020

An course which is authorized by University of Michigan and offered by coursera

Applied Data Science with python,	12-2020

An course which is authorized by University of Michigan and offered by coursera

Interpersonal Skills

Creative and Solution Based Attitude
Team Player

Interests

Graphic Designing
Basketball
Sketching
Research and analysis
